AgentBridge

HUMAN WORK. AMPLIFIED.

AI EMPLOYEES
FOR A MORE PRODUCTIVE WORLD

The Operating System for Digital Employees

Today every employee uses dozens of tools. AgentBridge connects them, understands your work, and gets things done — autonomously.

Connects your tools

EMAIL, DOCUMENTS, ERP, BROWSERS AND MORE

Executes real work

FROM SIMPLE TASKS TO COMPLEX WORKFLOWS

Your data stays yours

LOCAL-FIRST, GDPR-READY, ON-PREMISE OPTIONS

Built for every team

ADMINISTRATION, SALES, FINANCE, LEGAL, OPERATIONS

DALLA CHAT AI AL LAVORATORE DIGITALE AUTONOMO.

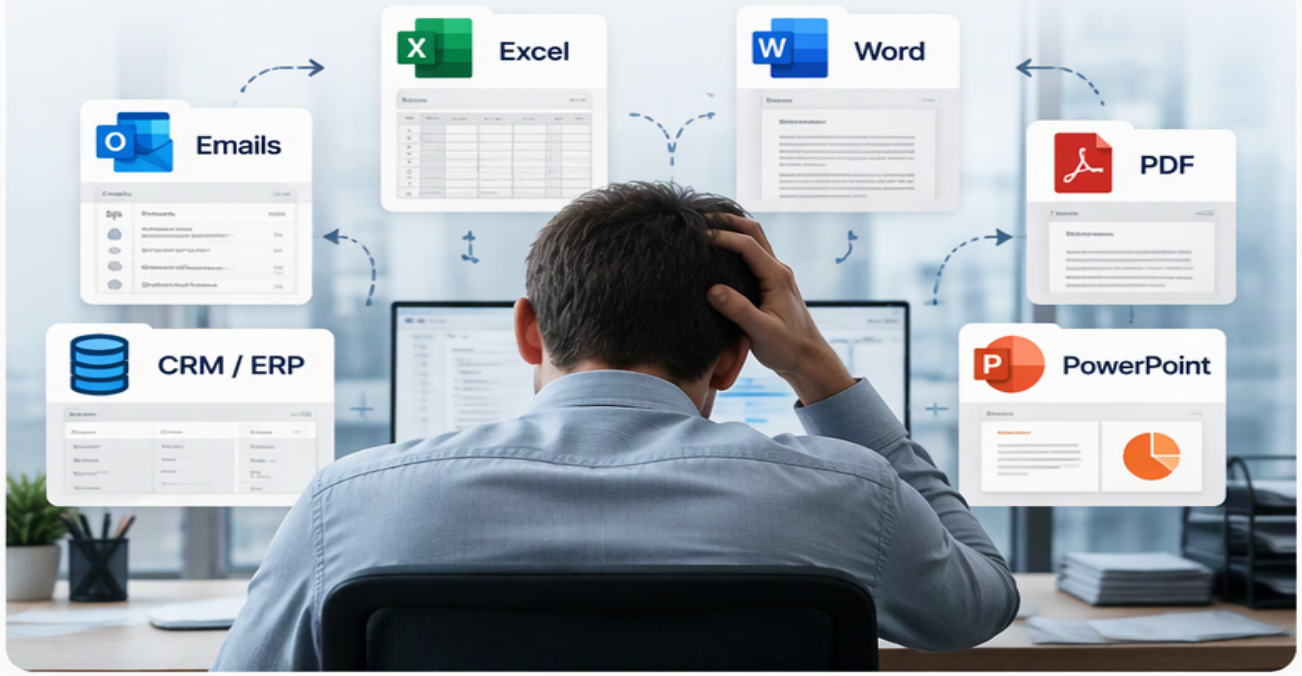

AGENTBRIDGE.COM

Knowledge Work Is Still Manual

Billions of hours are spent on repetitive, fragmented tasks across multiple tools.

A typical workday today

Employees spend their time switching between tools, searching for information and manually moving data.

Current AI solutions fall short

Today's AI tools are powerful, but they don't solve the real work.

Isolated chatbots
They answer questions, but don't execute work across your systems.

No real operational memory
They forget context and require constant repetition.

Limited data control
Most solutions depend on the cloud, creating privacy and compliance concerns.

Fragmented workflows
No seamless integration across the tools you already use.

High human involvement
They still require continuous supervision and manual work.

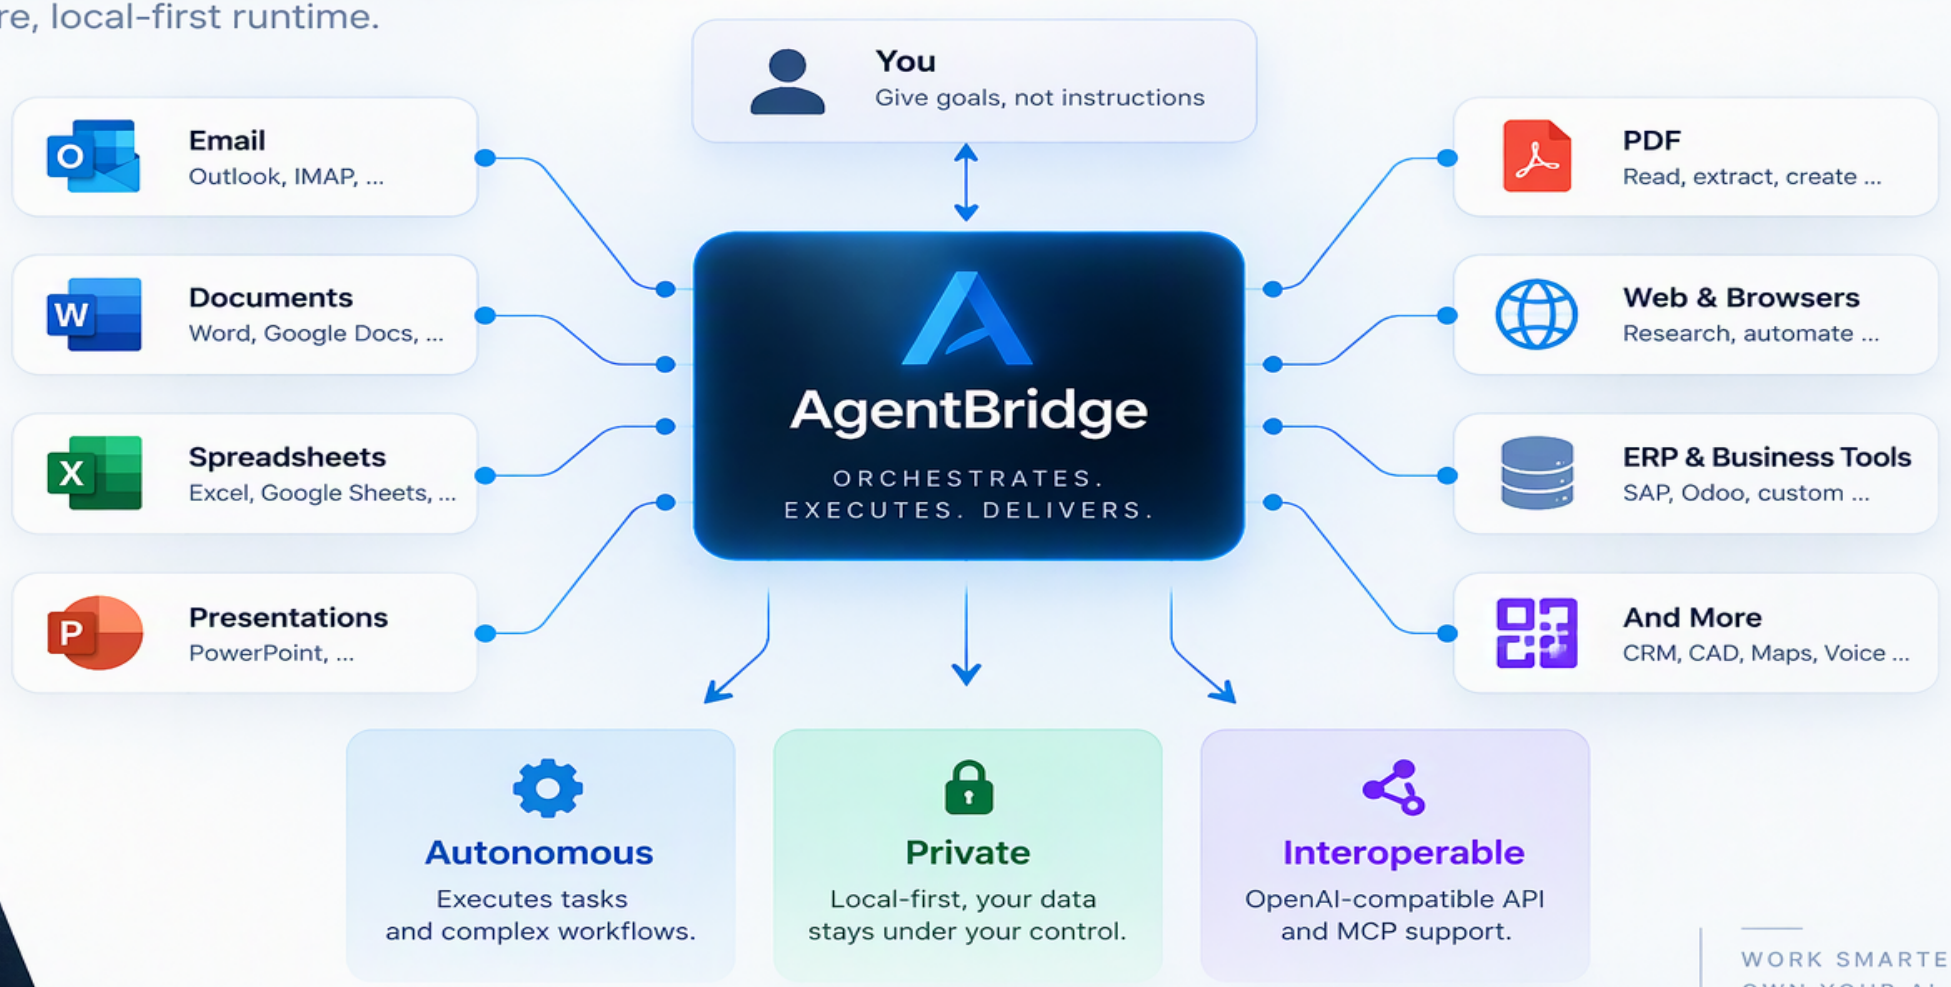

60–70%
of knowledge work is repetitive

High cost
for low-value manual tasks

High error rate
due to constant tool switching

A Digital Employee That Works Across Systems

AgentBridge connects LLMs, your tools and your documents in a single, secure, local-first runtime.

FROM TOOLS...

...TO OUTCOMES.

The AI employee for your office.

WHY WE WIN

A differentiated platform built for the era of ***digital*** employees

Privacy First

- Local-first architecture
- Enterprise data control
- Sovereign AI ready
- No cloud dependency

AI where the data already lives

Native Runtime

- Direct tool execution
- Lower latency
- Fewer moving parts
- Enterprise reliability

Tools are part of the engine, not external services

AgentBridge

Operating System
for Digital Employees

Digital Employees

- Role-based agents
- Persistent memory
- Autonomous task execution
- Multi-step workflows

From assistants to workers

Platform Ecosystem

- Extensible plugins
- Industry verticals
- Future marketplace
- Third-party integrations

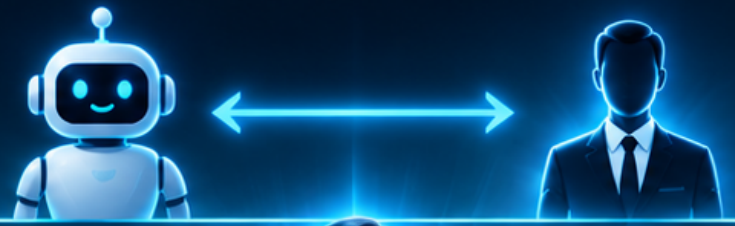

A growing ecosystem creates compounding value

Most AI solutions add intelligence to software.
AgentBridge *adds a workforce to the enterprise.*

BUILDING THE WORKFORCE OF THE AI ERA

From AI assistants to digital employees

TODAY
"1 AI = 1 Chat"

TOMORROW
"1 AI = 1 Employee"

- Sales Employee
- Reporting Employee
- Legal Employee
- Finance Employee
- Operations Employee
- Office Employee

DIGITAL EMPLOYEES
Powered by AgentBridge

CEO

- Human Employees
- Digital Employees

MISSION
"Every company will hire digital employees."

VISION
"AgentBridge is the operating system that powers them."
